Price conditions

- Annual increase of 2% per annum for years 2021, 2022 and 2023
- The fee distribution per Customer for the calendar year 2023 is preliminary. The Consortium will notify CUP of the final distribution per Customer by 31st August 2022.
- This new deal provides for unlimited free APC's for article publishing within CUP's Hybrid and Gold OA journals submitted by eligible corresponding authors affiliated with one of the participating CSAL members.
- The VAT calculation is based on the collections licensed for the relevant year. The more that is published by the participating institutions, the faster the transformation to Publish. Should the Publish figures increase and the value of the collection decrease (as we anticipate to happen each year due to CUP's transformative OA strategy) then these two factors work to transform the Read portion of the license to Publish. CUP anticipates the Publish % to increase more aggressively in the coming years. This calculation has been devised in order to reflect the most accurate view of Read vs. Publishing per deal.
- 75% DDP is agreed for additional print subscriptions for journals within the annual collections.
- CSAL Members maintain perpetual access rights to all titles in their respective licenced collections for the years paid. This includes not only the institutional subscription holdings but also the titles that make up the remainder of the collection. This does not include backfile years that are free with a current licence.

New Members

Other CSAL members may join the Licence Agreement at a fee to be determined by the Publisher.

Journals Leaving the Collections

If Cambridge University Press ceases to publish a journal then this journal will no longer be available in the packages on offer. The availability of titles in Cambridge Journals Online Collections will be reviewed annually. Cambridge will notify the Consortium of any titles leaving the list of available titles by 1 October.

Should the value of the collection decrease by more than 10% year on year, then adjustments will be made to the members' Flat Fees. By contrast, should the value of the collection increase by more than 10% year on year, we reserve the right to adjust the members' Flat Fees. Cambridge University Press will communicate any such adjustments in advance.

Moving Wall – Swiss National Licence

The Moving Wall refers to the annual current content for the licensor's Full Journals Collection. This is a dynamic product in that the Moving Wall for current content is added annually and made available after completing a 5 year embargo period to all Authorised Institutions in Switzerland. The Moving Wall includes all newly published and takeover titles that are included in the Full Journals Collection in any given year.

The Moving Wall commenced with the year 2016 content and will impose a 5 year embargo. The Moving Wall will now include 2017 - 2021 content based on an agreement commencing during 2020. For example:

- Based on an agreement commencing in 2016, the National Licence will be extended to include the 2016 Full Journals Collection as of 1 January 2022.
- As of 1 January 2023, the National Licence will be extended to include the 2017 Full Journals Collection.
- As of 1 January 2024, the National Licence will be extended to include the 2018 Full Journals Collection.
- As of 1 January 2025, the National Licence will be extended to include the 2019 Full Journals Collection.
- As of 1 January 2026, the National Licence will be extended to include the 2020 Full Journals Collection.
- As of 1 January 2027, the National Licence will be extended to include the 2021 Full Journals Collection.

The fee for the Moving Wall is offered in 4 tiers and is waived as long as the 95% - 100% (Tier 1) of the value of the CSAL licence for current content is maintained. For reference purposes, the 2021 value of the licence is £322,251.83. The licence fee for the current content that would need to be maintained will increase using the negotiated increase between the Consortium of Swiss Academic Libraries (CSAL) and Cambridge University Press. Should the annual accumulated CSAL licence fees not be maintained, the Moving Wall fee will be incurred and based on the value of the CSAL licence for current content that is renewed. Tier 2, 3 or 4 would be then applicable as follows:

Moving Wall Fee		Example of Moving Wall Fee based on the 2021 Full Journals Collection – list price £132,060
Tier 1: 95%-100% of the CSAL licence for current content is maintained	Moving Wall Fee is waived.	Moving Wall Fee is waived.
Tier 2: 75% - 94% of the CSAL licence for current content is maintained	70% discount on the Full Journals Collection list price	£39,618

Schedule 4

Access & Metadata

1. The Press's Shibboleth service manages access to Cambridge Core and some of its other online services based on (i) eduPersonPrincipalName (ePPN) or (ii) eduPersonScopedAffiliation (ePSA) or (iii) eduPersonScopedAffiliation (ePSA) in combination with eduPersonEntitlement (ePE); at the present time, the Press does not request/require other attributes.

Attributes are used solely during authentication as the basis of the basic access control decision and are subsequently discarded. No attribute or other information is retained or displayed on-screen in Press services (including Cambridge Core). Attributes are not used to provide a persistent user experience across multiple sessions. It is conceivable that the provision of a persistent user experience across multiple sessions based on privacy-preserving attributes would be one of the objectives of future development work, particularly if there is demand for this feature from access federations and/or Identity Providers. Persistent user experience across sessions will not, however, be implemented or introduced in a manner inconsistent with the policies, rules and standards of Identity Providers from the various access federations of which the Press is a member.

2. The Publisher sends the following data to ProQuest/ExLibris monthly: Journals metadata XML feed. Ebooks metadata XML. MARC records for all ebooks published on Cambridge Core. Proquest /ExLibris also pick up our KBART lists from the page above to create corresponding collections in their systems. The Publisher has regular meetings with staff from ProQuest and ExLibris to check on data and discuss any customer questions. Processes do not always run smoothly with such a complex chain of interactions between different systems, but the Publisher endeavours to fix any problems quickly if they arise.

Cambridge Core does not provide an OAI-PMH-compliant metadata retrieval service. The Publisher is developing a Core API that would support metadata harvesting at scale of the kind described, but for the time being, in the absence of a dedicated tool for this purpose, they are unable to comply with this clause today. They do however provide our metadata to the Swiss consortium (to an FTP location) to permit this form of indexing.

3. All standard sales collections are described in KBART format, plus full title lists of All Books and All Journals are available in KBART format for customer use. These can be found at: <https://www.cambridge.org/core/services/librarians/kbart>. Specific MARC records and KBART files can also be sourced from within your logged-in administrator account on Cambridge Core.

Double Dipping & Green Open Access

Cambridge University Press have a Double Dipping Policy to reduce hybrid journal subscriptions to prevent charging both authors and subscribers for Open Access content <https://www.cambridge.org/core/services/open-access-policies/open-access-journals/double-dipping-policy>

Starting in 2018, we define double-dipping as occurring when Open Access content effectively replaces subscription (non-Open Access) content. Where non-Open Access content in a journal has been reduced over a 4-year rolling window as a result of the publication of Open Access articles, the Open Access portion of the journal's content is acknowledged through a reduction in subscription prices over the following three years.

The Open Access landscape continues to evolve. We will be conducting further reviews of our journals pricing policy in order to continue to operate a fair and sustainable model, and as a result our new double-dipping policy is likely to be revised within three years. The following steps are followed to calculate double-dipping:

- i. Step 1 – Assess the change in non-OA articles over the past 4 years
- ii. Step 2 – Assess how many of the OA articles double dipped, if any

There is no double-dipping if there is no drop in the number of non-OA articles.

If the number of OA articles is less than the drop in non-OA articles, then all the OA articles are considered to be double-dipping.

If the number of OA articles is equal to or greater than the drop in non-OA articles, then the number of double-dipping OA articles is the drop in non-OA articles.

- iii. Step 3 – Calculate the value of double dipping by dividing the total APC revenue in the analysis year by the total number of OA articles and then multiply by the number of double dipping OA articles.
- iv. Step 4 – Determine the discount for the pricing year by spreading the discount over three years, so we take one-third of the double-dipping revenue as a percentage of the subscription revenue and apply this as a discount % in the pricing year (for example, 2019) and the two subsequent years (2020 and 2021).

This discount will return the full value of the double-dipping in three years. This double-dipping policy took effect in 2018 any discounts would be applied to 2020 prices. If in 2019 the journal publishes more double-dipping articles, then a new discount will be added to the 2018 discount for the next pricing year (2021).

Subscribers already receiving a substantial discount on a journal's subscription price, via a consortium/national licence, for example, will not receive an additional discount on their collection access fee as a result of these changes due to already heavily discounted fees.

Green Open Access

Subscription journals published by Cambridge University Press:

- allow Green OA with no embargo period (HSS journals) or six-month embargo period (STM journals) for the 'Accepted Manuscript'. The accepted manuscript is the version of the paper that has been submitted to a journal, peer-reviewed and accepted for publication but not yet copyedited or typeset or had any other publishing processes applied (such as adding metadata). Please see below for more details.
- after an embargo of five years, allow Swiss institutions and authors affiliated to the institutions as defined under Authorised Users in this contract, to upload the 'Published PDF' (with publisher's layout and pagination) in non-commercial discipline-specific and/or institutional repositories and make them available in Open Access. For the avoidance of doubt, archive content allow Green OA for the 'Published PDF' for authored or co-authored articles for authors with permanent residence in Switzerland and affiliated to the institutions as defined under Authorised Users in this contract, after the five year embargo has expired.
- offer immediate Gold OA through a hybrid option for subscription journals (including journals published on behalf of learned societies), or if published in wholly OA journals, on payment of a one-off Article Processing Charge (APC)
- offer authors the flexibility of a range of Creative Commons licenses for Gold OA, allowing them to choose whichever matches their particular funding and publishing requirements.
- do not charge both authors and subscribers for OA content, as detailed in our double-dipping policy statement.

Read & Publish Clauses

READ AND PUBLISH FOR CONSORTIA:

This additional clause uses the following defined terms:

Article: a research, case report, brief report, review or rapid communications format article (as defined by Licensor).

Article Processing Charges (APCs): the fee a publisher will sometimes charge for making articles Open Access.

Cambridge Core: Licensor's online platform for books and journals.
