The Participating Institution shall ensure that the third party vendor shall immediately delete the ScienceDirect Subscribed Product dataset and TDM Output from its servers upon termination or expiration of this Agreement or, if earlier, the agreement between Participating Institution and the third party vendor except for the TDM output and the snippets. Notwithstanding the foregoing, you are permitted to retain a private copy of the corpus, or excerpts thereof, for reasons of data archiving requirements and to make this corpus available for internal institutional uses or for peer review, funding or ethics purposes (but not for further external distribution by these agencies or reviewers). Notwithstanding the foregoing, and for purposes of clarity, the Participating Institution and the Authorized Users will not be required to delete incidental copies of individual items that would be impractical or impossible to remove (i.e. as may have been embedded in spreadsheets, reports and similar printed or electronic documents), provided that such individual items will continue to be subject to the usage provisions of the Agreement, which provisions will survive the termination of the Agreement.

Participating Institutions may access the API Developer Portal where the ScienceDirect API’s are made available at <https://dev.elsevier.com/>

Schedule 3

Open Access Terms

1. Background

- 1.1. Corresponding authors affiliated with a Participating Institution shall be referred to as “Corresponding Author(s)”. For the purposes of eligibility, the Corresponding Author is the single author who manages the publication process for an article from submission to post acceptance and corresponds with Elsevier on the same.

2. Open Access

- 2.1. From the date of signing by both parties until the end of the Initial Term, Corresponding Authors are granted the right to publish an unlimited number of open access articles in the Elsevier owned and Elsevier published journals set out in Annex A to this Schedule 3, without having to pay an article publishing charge (“APC”), subject to the terms of this Schedule 3.
- 2.2. All open access article types are eligible and include: full length articles; review articles; case reports; data-in-brief; micro-articles; original software publications; practice guidelines; protocols; replication studies; short communications; short surveys; and video articles. If new OA eligible article types become available under open access agreements in the future both parties will align to discuss their inclusion.
- 2.3. Journal inclusions may be subject to small changes; including; but not limited to; changes resulting from the addition of new journal titles; journal transfers and/or changes of business model or ownership. Elsevier will send an updated title list quarterly.

3. Workflow

- 3.1. The Elsevier publishing workflow will use the acceptance date to determine the eligibility of an article under this Agreement. In order to benefit from the commercial arrangements mentioned in this Schedule 3; articles submitted by the Corresponding Author must be accepted by the relevant Eligible Journal during the Initial Term.
- 3.2. In Elsevier’s journal workflow; the Corresponding Author must specify the Participating Institution that they are affiliated to and the relevant research funding source(s). Based on this data; Elsevier will provide the Corresponding Author with the relevant publishing options. In order to improve identification; Elsevier will remain open to using e-mail domain recognition; ror.org or other recognized institutional identifier; and IP range recognition should these mechanisms become more reliable.
- 3.3. Elsevier will clearly indicate the availability of an institutional funding agreement to Eligible Authors both within the publication process; on its website and when communicating with Eligible Authors. It will make clear that Eligible Authors do not need to pay article publishing charges for publication of open access articles.
- 3.4. In the event a Corresponding Author has chosen the open access option; the journal article; if accepted for publication in an Eligible Journal; shall be published under a CC BY license by default and a CC BY-NC or CC BY-NC-ND license only if requested by the Corresponding Author; subject to the conditions and process set forth herein with the authors of such article retaining their copyright (other than for certain society journals). CC BY will be the default license option presented to the Corresponding Author.

- 3.5. The Elsevier Open Access Platform (“EOA Platform”) requires each Participating Institution to make reasonable efforts to accurately validate that the relevant Corresponding Author is affiliated with the Participating Institution; and will provide the Participating Institution with the available relevant details including Corresponding Author name and e-mail address; DOI; article title; article type; journal title; research funding; submission and acceptance date of the article and the APC. The Participating Institution will receive a notification via email to validate a Corresponding Author’s eligibility on the EOA Platform.
